

About EV

{mosimage cw=300 ca=400}

EV Veterinary Products Ltd a dedicated supplier to the equine veterinary and breeding industry, established in 2002 by Sarah Stokes & Martin Davies. We have a reputation with our customers for supplying quality equipment, supported with a high quality service. Our staff are on hand to assist you through the order process, or alternatively use our on-line ordering system.

Our range has developed over the years and now covers leading diagnostic equipment such as the Biolitec Diode Laser and the PulseVet Focused Shockwave Therapy unit. Recently we became the UK and Ireland distributors for the Haico operating tables.

We have become more and more renowned for our supply of Video Endoscopy Equipment and are proud to announce, that together with our manufacturers, we have developed the first commercially available, horse based, remote airway endoscope. This strengthens EV's position in both the endoscopy and equine market place.

So for your Equine Veterinary products remember EV are here to help in everyway we can.
