

Stocks

Through continued development with our manufacturer, we are now able to offer a range of stocks to meet your needs. Order our standard set, or have them made to your own design and specification to meet the needs of your practice.

We will deliver and offer full on site installation by our team so you can be assured of the continued quality you will find from EV.

Please contact your local representative to discuss your requirements.

We also have our own Dummy Mare designed in conjunction with leading breeders.
